SAN MIGUEL COUNTY Housing Code Update

SSR Meeting #3 Summary

January 2025

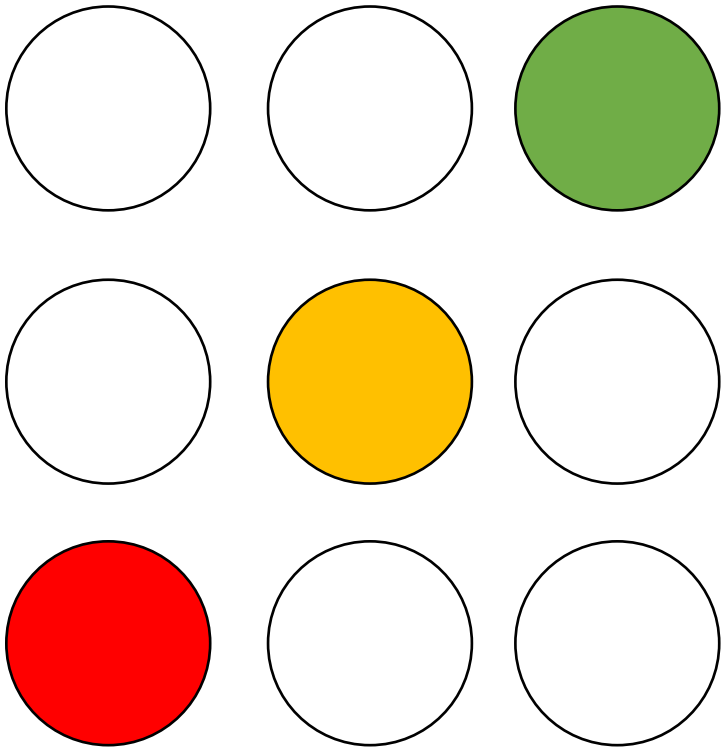
Meeting Overview

The third Strategic Stakeholder Roundtable (SSR) meeting was held for the San Miguel County Housing Code Updating project on Monday, January 26th, 2026 from 2:30pm – 4:30pm.

This project builds on experience with the community housing initiatives to develop community-supported regulatory reforms. This comprehensive code audit reviews all housing-related regulations, including the Community Housing Zone designation, to identify and address barriers to housing development. The process also satisfies the Proposition 123 "Fast Track Approval" requirement, positioning the County to access dedicated state funding for affordable housing.

The purpose of this January SSR meeting was twofold: first, to understand which housing types, densities, and levels of review are appropriate for San Miguel County and second, to begin drafting a streamlined review process for affordable housing development applications in compliance with Proposition 123 requirements. The following pages represent a high-level summary of the meeting and feedback.

Recommendations Support Key



Green light – strong consensus, broad support

Yellow light – mixed or conditional support

Red light – strong consensus, broad dissent

SAN MIGUEL COUNTY
Housing Code Update

STREAMLINED REVIEW DISCUSSION

Most of the discussion centered around designing a streamlined review process for affordable housing development applications (known as "Fast Track" in Proposition 123). There was general consensus among SSR members on the following:

- **Review Timeframe:** 90 days *(no change from minimum requirements)*
- **AMI Range:** streamline all applications with a majority of units affordable to:
  - Rentals: 120% AMI *(**more inclusive** than 60% AMI requirement)*
  - Ownership: 200% AMI *(**more inclusive** than 100% AMI requirement)*
- **Deed Restriction Timeline**
  - Prioritize permanently affordable housing (***more restrictive*** *- Proposition 123 does not require any specific timeline to maintain affordability*)
- **Unit Threshold** *(**potential change** from minimum requirements)*
  - General consensus that in R1 Telluride School District, only projects with 50% or more affordable units should be streamlined *(no change from minimum requirements)*
  - Potential change in other areas of the county to streamline all project with 30% or more affordable units, pending input from incorporated towns (***more inclusive*** *than 50% or more unit threshold)*
- **Applications Eligible** *(no change from minimum requirements)*
- **Concurrent Applications** *(no change from minimum requirements)*
- **Noticing Requirements** *(no change from minimum requirements)*

OTHER DISCUSSION TOPICS

In addition to designing the streamlined review process, SSR members expressed:

- A desire to learn from peer communities with similar housing markets, economies, geographic constraints, and regional dynamics (such as Aspen and Jackson)
- An interest in maintaining separate regulations for the East End Area and the rest of the county
- Facilitating simplicity / flexibility when appropriate for developers to build affordable housing (emulating Jackson's success with facilitating public-private partnerships to create more affordable housing units)

NEXT STEPS

Before the next meeting, SSR members will **complete a poll** with images of different housing types at different densities, considering:

- Whether these housing types are appropriate for the East End and Norwood/Placerville areas of San Miguel County, and if so, where?
- Whether you'd consider this kind of housing as low density, medium density, or high density.
- Whether or not the community should have the opportunity to provide input on this type of development at a public hearing.
- Whether the distance between units and home types (such as single-family home, duplex, fourplex, apartments, condominiums, etc.) is appropriate in San Miguel County.
