15

00:02:38.958 --> 00:02:58.158

Miles Graham: So, Carrie, why don't you jump right into it? And I will grab that diagram.

****

18

00:03:56.368 --> 00:04:07.708

Kerry: ready set go. You know some things to consider within your own organization, and for those of you who are just interested in supporting the future of public transportation in your community

19

00:04:07.708 --> 00:04:28.547

Kerry: would be to think about resolutions of support. Think about, if you might be that person who wants to write a letter to the editor. If you want to volunteer and make phone calls, those are all great decisions to make. Now, if you want to host a house party, you know, to talk about the importance of public transportation, and what the operation and maintenance of this gondola means

20

00:04:28.870 --> 00:04:44.655

Kerry: those are all things to start brainstorming now, so that we are ready to go. Because once smart refers that ballot language. We know what the community will be considering voting. Yes, on we really need to be ready to go. So those are things to consider.

21

00:04:45.028 --> 00:05:00.627

Kerry: some other upcoming kind of those big deadlines, you know. Think about the middle of October is when those ballots go out. So we really need to be ready in the middle of October to have a full fledged campaign on the ground full of committed

22

00:05:00.628 --> 00:05:23.157

Kerry: citizens and endorsers. And then, of course, we know that election day very big ballot, likely the largest ballot that Colorado has had, and so we'll need to be doing the hard work to make sure that people are focused on our local issue, and they're digging into that issue. So that's kind of a broad level update. If you are interested in volunteering for the campaign.

23

00:05:23.452 --> 00:05:40.847

Kerry: If you are an official role, of course you'll need to volunteer for that campaign in a totally volunteer capacity outside your official role. If you aren't in an elected position in an official role. Then you can join at any time. But we'd love to have you. We will be building out a friends of the gondola Committee.

24

00:05:40.848 --> 00:05:53.897

Kerry: That will be that crew that endorses. This talks to folks, writes those letters and then, the formation of the official committee is in works as well. So that's kind of where we are in the next exciting step.

*****

38

00:08:05.058 --> 00:08:29.548

Kerry: Yeah, that's right. Thanks, Miles. That was a perfect explanation of how official organizations can work on that education and presented facts. And then the campaign committee can come in and support separately, but parallel tracks of of making sure everyone knows what's at stake with a yes vote for this campaign. Other activities will certainly be devised. As the campaign committee comes into formation.

39

00:08:29.688 --> 00:08:44.627

Kerry: There is no official campaign committee yet. Of course. so. But you know other activities will will likely include, like what I just mentioned. You know that classic letter to the editor. That local voice is so important in the local newspaper.

40

00:08:45.048 --> 00:09:04.808

Kerry: You know, but also hosting small, informal political gatherings and looking for those opportunities to share the story of the extensive process that has brought us to this vote in November, and the importance of the future of these communities having this ballot initiative pass so

41

00:09:05.188 --> 00:09:15.467

Kerry: a really exciting time of all your guys. Incredible, collaborative, hard work, kind of coming to a summit. So that's really, really a fun and exciting time.

******

116

00:22:27.768 --> 00:22:35.868

Miles Graham: how all that cash flow works, and there is an issue amongst the TMVOA members, which are all the residents in Mountain village

117

00:22:36.278 --> 00:22:37.188

Miles Graham: about.

118

00:22:37.518 --> 00:22:39.088

Miles Graham: How are we paying for this

119

00:22:39.158 --> 00:22:46.688

Miles Graham: during those 3 years? We're paying twice now. That's their simple conversation about it, which they are, they're being taxed.

120

00:22:46.728 --> 00:22:48.208

Miles Graham: And then we're still paying.

121

00:22:48.388 --> 00:22:58.977

Miles Graham: Now. Okay, we're accumulating tax into the capital cost component, so that if we structure it properly, there may not be a tax increase for the capital component of the new gondola.

122

00:22:59.548 --> 00:23:02.048

Miles Graham: That's the expectation. If that's true.

123

00:23:02.118 --> 00:23:04.577

Miles Graham: or if that's an expectation.

124

00:23:04.758 --> 00:23:06.497

Miles Graham: then it's a wash.

125

00:23:07.068 --> 00:23:09.957

Miles Graham: But, on the other hand, if there's a tax for the new gondola.

126

00:23:10.328 --> 00:23:12.278

Miles Graham: then it gets a little more fuzzy. (emphasis added)

127

00:23:13.468 --> 00:23:22.658

Miles Graham: and I see that gives you heartburn Mia, but but that you you got to admit that's a different set of circumstances, and all the people in Mountain village don't get to vote in the smart election.

128

00:23:23.598 --> 00:23:25.477

Miles Graham: They just get to pay taxes.

129

****

170

00:29:53.548 --> 00:30:19.297

Miles Graham: That was why this group decided to start with the collections is because it it not only gives us a head start on some of those capital collections, but it also gives us the foundation to actively pursue grants once we have our local match in place, too, but I think

we're all in alignment that we need to answer the question. Why, I said, the mistake we made is, we made the collections in ’25 ‘26 and ‘27. We started that out with a with a calculation, saying, This is M. And O.

171

00:30:19.518 --> 00:30:20.668

Miles Graham: It's not M. And O.

172

00:30:20.718 --> 00:30:27.087

Miles Graham: It's collecting money for the capital cost of the Gondola. Yeah.

173

00:30:27.088 --> 00:30:48.018

Paul Wisor: I mean, I'll just say that I spoke in front of a group of 140 realtors last Wednesday, along with Miles and David, and was asked this very question, and I didn't get any pushback, and, in fact, got a lot of nods when I said that this election is largely being conducted for the purpose of gathering

174

00:30:48.018 --> 00:31:10.208

Paul Wisor: operation and maintenance dollars, because we will not be able to participate in any effort to get outside Federal funding or state funding help for the capital. And so we need to prove our investment before we're able to even have those conversations. And so we all need to make that commitment before we're able to get to the big prize. With respect to the gondola and miles.

175

00:31:10.208 --> 00:31:13.858

Miles Graham: All that needs to be more widely distributed. Right.

*****

189

00:32:45.808 --> 00:32:57.657

Miles Graham: That is, I think, what we all agree. Now we can start the meeting. And so, David, I know you're you came off camera for a second. There, I want to make sure you had a chance to to say your piece. If you had something to add.

190

00:32:57.658 --> 00:33:04.768

David Averill: No, I'm good. I was just gonna affirm what Paul experienced at the TAR meeting last week, and I would also say, You know we did talk about

191

00:33:05.247 --> 00:33:22.107

David Averill: deferring collections later. But there's some TABOR implications about not collecting in the year you vote, and having to do estimates that can get kind of sticky. I think that was part of what also drove us to making the estimate and and collecting those estimates in the 1st collecting those funds in the 1st 2 years, 3 years.

******

307

00:49:18.368 --> 00:49:19.967

edward.parks: So we're going to move into November.

308

00:49:27.848 --> 00:49:28.738

edward.parks: So

309

00:49:29.328 --> 00:49:32.802

edward.parks: and the reason I've got the cost estimates here

310

00:49:33.548 --> 00:49:55.837

edward.parks: is because we wanna make sure. As we said before, in September, I wanna get make sure we get those to assumptions to the vendors. They can help us out with these cost estimates. We give them enough time to do those calculations. That's why our assumption is November. If that changes and they do it faster or whatever like we're we're

gonna have to work with them through that time. But right now, saying November, just to assume some time for them to make those calculations.

311

00:49:56.198 --> 00:49:59.438

edward.parks: And we're gonna continue that IGA amendment discussion then.

312

00:50:00.468 --> 00:50:05.448

edward.parks: and we'll get into December, and that will help us move into our capital funding plan.

313

00:50:05.818 --> 00:50:06.827

Miles Graham: So I guess

314

00:50:07.218 --> 00:50:18.147

Miles Graham: from my perspective, it seems like we every meeting, we say. Oh, we're going to get to the cost estimates, you know, next month, or whatever. And and just so, why is this November? Is it

315

00:50:18.278 --> 00:50:23.918

Miles Graham: because we still need much more information to give to the vendors, or just to clarify for me the timing.

316

00:50:23.918 --> 00:50:29.888

edward.parks: So if we, if you think about it like in September, if we finalize our assumptions

317

00:50:30.818 --> 00:50:34.827

edward.parks: right? And then we provided those assumptions to the vendors.

318

00:50:35.768 --> 00:50:45.008

edward.parks: The assumption, then, is like, I need to give them time to actually make those cost estimates right to run the data to make sure they're they're doing those things they asked them to do.

319

00:50:45.328 --> 00:50:49.407

Miles Graham: You're building in sort of a 60 day turnaround thought process. Okay, yeah.

320

00:50:49.418 --> 00:50:57.768

Miles Graham: Okay. What one concern I see is that come November. We're going to be coming out with a capital cost estimate right before the vote on the

321

00:50:58.248 --> 00:51:00.928

Miles Graham: new new quote, M. And O.

322

00:51:00.938 --> 00:51:04.908

Miles Graham: It's still classified as M. And O, whatever that vote's gonna be labeled.

323

00:51:05.408 --> 00:51:08.568

Miles Graham: we're going to come out with an 80 million dollar number.

324

00:51:09.598 --> 00:51:20.997

Miles Graham: that might not be the best unless we have a way, then, to explain where the 80 million dollars is coming from, people are going to say, Wait a minute. You're getting me to vote for this this number, and then there's going to be another number (emphasis added)

325

00:51:21.438 --> 00:51:26.887

Miles Graham: when there's a chance. There is no other number. There's only the one vote for for taxes.

326

00:51:27.168 --> 00:51:30.618

Miles Graham: in November, and then there, the rest of it we might be able to get

327

00:51:31.428 --> 00:51:33.638

Miles Graham: without more taxes.

328

00:51:33.658 --> 00:51:36.938

Miles Graham: It's not the most strategic timing.

329

00:51:37.308 --> 00:51:38.408

Miles Graham: Yes, ma'am.

330

00:51:39.115 --> 00:51:42.740

Miles Graham: I'm not looking to swim upstream here.

331

00:51:44.268 --> 00:52:07.228

Miles Graham: I could find about anything all day today. I agree, I think, that it is. I think November does feel mildly problematic to get these specific numbers. However, I think we can mitigate that by already saying that we know that there is a capital number coming. We don't. I don't need to say I need don't need to know that it's gonna be 83.5 million dollars to be able to say, we're going to fund this.

332

00:52:07.698 --> 00:52:32.438

Miles Graham: You can say whatever you like as far as Mountain village identity goes. But like we're going to fund this with, you know, from our capital account, you know, down our capital fund down here. We're going to fund this with the capital that we've created or collected thus far. You know, through those years, I think that I think as long as we have the narrative as to how we're going to get that money, and you know, and we're getting Federal Federal grants, whatever it could potentially be.

333

00:52:32.438 --> 00:52:42.768

Miles Graham: I think, as long as we have the narrative as to how we are going to pay for it, we don't necessarily need the very specific like downtime. I agree with you, but I think if we move that up to October

334

00:52:43.518 --> 00:52:57.637

Miles Graham: where we know, Jeff, if we're just talking about conceptual cost estimates that we got a 60 million dollar machine, and we got 20 million dollars worth of station modifications to do. So. We have an 80 million dollar thing. And we're gonna get

335

00:52:57.678 --> 00:53:13.818

Miles Graham: collect 20 million dollars from the after the vote or 21 million dollars. So now we're down to 60 million dollars, and TMVOA is going to put up 20 million and the down of Telly right? Going to do something, and we're going to get so much from the Federal government. So we can tell people there's not another tax increase coming.

336

00:53:14.268 --> 00:53:18.738

Miles Graham: The the fear going into the vote is, Oh, this is just the 1st bite.

337

00:53:19.078 --> 00:53:20.978

Miles Graham: and the next byte's a big number.

338

00:53:22.003 --> 00:53:45.977

Miles Graham: Which it will look like unless we have some explanation about how that capital is going to be collected, and I don't think that that changes there. The structure of how we're going to get that information given to us, though I think that they can still stay on their timeline. They can still provide that end number that end estimate to us in November. We just need to be prepared to explain to the voters

339

00:53:46.188 --> 00:53:50.437

Miles Graham: that we are not planning on going to them with another.

340

00:53:50.508 --> 00:53:54.617

Miles Graham: I think we need to be not only ready, we need to be emphatic.

341

00:53:54.808 --> 00:53:59.308

Miles Graham: Well, sure. Yeah, yeah, we've got the capital cost under control.

*****

370

00:57:30.658 --> 00:57:34.778

Amber Blake: we really have to remember we can't get these conceptual cost estimates

371

00:57:34.848 --> 00:57:37.908

Amber Blake: until we have some of these key remaining design

372

00:57:37.918 --> 00:57:56.988

Amber Blake: considerations discussed and considered and given direction on and then Jim made a great point. He emphasized that it's a conceptual cost estimate. And so one

thing we just need to be aware of is the conceptual cost estimate will come in the number that we're talking about with the conceptual cost estimates.

373

00:57:57.018 --> 00:58:05.788

Amber Blake: and the grant is related to remit replacing the existing condition ex condition existing system with like.

374

00:58:05.878 --> 00:58:22.107

Amber Blake: And so any big station area changes design improvements beyond what exists today is going to be funded with something different. And I think that's something that's going to be. It's nuanced.

375

00:58:22.288 --> 00:58:45.337

Amber Blake: and it's critical that the public understands. If we put, let's say we've been saying 80 million. So I'm just gonna say 80. So if 80 million is the project cost, and then there's another 10 million for station costs. That 10 is not included in what we say. The replacement of the gondola is, and I think that is just something that we really have to watch out for, because

376

00:58:46.388 --> 00:58:49.448

Amber Blake: it's a complex projects with multiple

*****

781

01:45:01.358 --> 01:45:13.127

Miles Graham: why we need to start the revenue collection in 2025, and how it's going to be used. And I I think, just to be clear. I don't know that we have an issue with the ballot language per se. But I think in the

782

01:45:13.358 --> 01:45:21.628

Miles Graham: marketing and campaign approach there is some things that need refinement and clarification is that.

783

01:45:21.778 --> 01:45:31.288

Miles Graham: do you all agree? We're not changing the ballot language. Right? Yeah, exactly. Maybe it is just all marketing. But but I don't know that tweaking the ballot language wouldn't be helpful.

784

01:45:32.058 --> 01:45:39.727

Miles Graham: I think that my perspective, Jim, is that the ballot language is really driven by the TABOR laws. It's like a cookie cutter thing.

785

01:45:40.238 --> 01:45:45.768

Miles Graham: Yeah. So my point is that we're going to collect money for the capital investment in a new gondola.

786

01:45:45.958 --> 01:46:01.088

Miles Graham: and that's that needs to be in bold print. It needs to be punched up a little bit, that's all. It's actually like the first.st Yeah, it's capital. Okay, that's why I asked. That's why I asked David to read it. Yeah, so that we could. That's the message

*****

796

01:47:42.148 --> 01:47:54.017

David Averill: And let's also keep in mind. Sorry my camera is all off here. Let's also keep in mind that the exact ballot language was used in the Keating's most recent poll as well. So it is already kind of out there. We are already kind of gauging reaction to it.
