SAN MIGUEL COUNTY Housing Code Update

SSR Meeting #5 Summary

April 2026

Meeting Overview

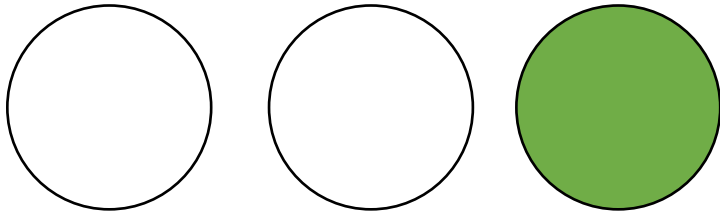

The fifth Strategic Stakeholder Roundtable (SSR) meeting was held for the San Miguel County Housing Code Update project on Monday, April 27th, 2026 from 1:30pm – 3:30pm.

This project builds on experience with the community housing initiatives to develop community-supported regulatory reforms. This comprehensive code audit reviews all housing-related regulations, including the Community Housing Zone designation, to identify and address barriers to housing development. The process also satisfies the Proposition 123 "Fast Track Approval" requirement, positioning the County to access dedicated state funding for affordable housing.

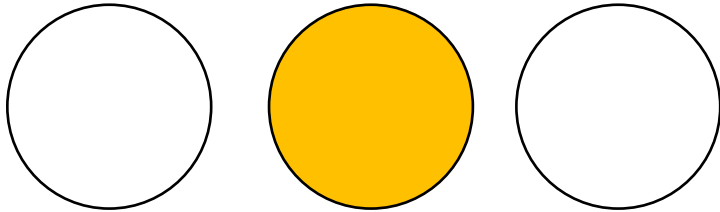

The purpose of the 5th SSR meeting was twofold. First, to review the proposed draft Accelerated Housing Review Process to get SSR group feedback prior to the Planning Commission hearing. And second, to review the recommended changes for housing types, zoning and density adjustments, and levels of review to understand which are ready to be finalized and which need more discussion to be tailored to San Miguel County. The following pages represent a high-level summary of the meeting and feedback.

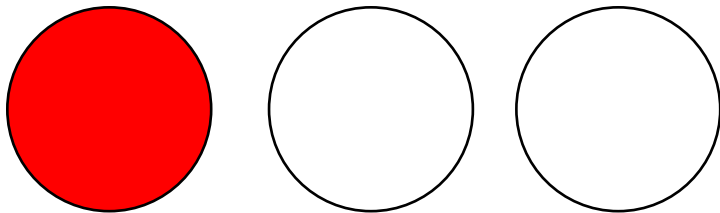

Recommendations Support Key

Green light – No Further Discussion Needed

Yellow light – More Discussion Needed

Red light – Did Not Receive 70% Support
to Move Forward

ACCELERATED HOUSING REVIEW

- ○ ○ Accelerated Review Draft as presented – did not receive 70% vote of recommendation

Discussion centered around the following:

- *Question whether there could be a function price cap on the deed restriction – would need housing authority to weigh in*
- *Update draft to include that each new sale or rental of unit would need to meet the qualifying AMIs*
- *Add language that references the existing deed restriction section of the code*
- *Question about whether the proposed AMI levels are sufficient (for reference, the 120% for rental and 200% for sale in the draft were included per SSR discussion in the January meeting)*
- *Concern that we're not able to cap project size*

STANDARDS FOR ADDITIONAL WORKFORCE HOUSING TYPES

- ● ○ Allow cottage clusters and cohousing in the CH, MD, and HD zones
- ● ○ Allow tiny homes as well as RVs, yurts, and other alternative living spaces in CH, MD, and HD zones when they will be used for seasonal workforce housing
 - *Need more discussion on where they should be allowed*
- ● ○ Consider provisions that only allow cottage clusters within one mile from existing towns
- ○ ● Separate Townhomes from Multi-family dwelling definition resulting in 4 housing types:
 - *Family detached*
 - *Duplex*
 - *Single-family attached*
 - *Multi-family*
 - *Additional suggestion to add live-work home definition*
- ● ○ Allow for Duplex and Single-family Attached (townhomes) wherever Single-family detached home types are allowed

STANDARDS FOR ADDITIONAL WORKFORCE HOUSING TYPES

- ● ○ Remove references to 'live/work units' and instead allow for mixed-used buildings with workforce housing multi-family buildings in Wright's Mesa, AHPUD, Commercial, and Mixed-Use zones to include housing off-site workers

Discussion centered on the following:

- *Update so that the housing doesn't require the tenants to also work on-site*
- *Make sure that both vertical and horizontal mixed-use is ok*
- *Exclude remote workers – attach to existing San Miguel County Deed Restriction*

- ● ○ Allow ADUs by Right in the R, LD, MD, HD, CH, and WMTR zones

Discussion centered on the following:

- *Would like to revisit definitions of ADUs, not have different sizes for different zones*

REGULATORY INCENTIVES AND ZONING ADJUSTMENTS

- ● ○ Use existing County's R-1 deed restriction to qualify for the *density bonus* in exchange for guaranteed AMI targets

Discussion centered on the following:

- *Want to make sure that the bonus pairs well with the changes to baseline density*
- *What would be the qualification to receive the density bonus?*

- ○ ● Update standard setbacks to reflect PUD setback allowances

- ● ○ Refine the Community Housing Zone – mostly keep unchanged except

- *Revise purpose statement to better reflect community priorities*
- *Reduce baseline density allowance to 15 DU / acre, density bonus*
- *Allow cohousing units*
- *Allow development up to 45 feet in height for more deeply affordability restrictions rather than tied to net zero development*

Discussion centered on the following:

- *Interest in having fewer du / acre for larger acre projects*
- *Nick interested in getting rid of CH zone entirely – would still apply to land with this existing zone*

REGULATORY INCENTIVES AND ZONING ADJUSTMENTS

- ● ○ Increase base densities to match PUD allowances and add Density Bonus

Discussion centered on the following:

- *Want to make sure that the bonus pairs well with the changes to baseline density*
- *What would be the qualification to receive the density bonus?*

- ● ○ Adjust process for specific housing types to reduce reliance on PUDs

NEXT STEPS

- Will conduct additional SSR meetings. Next meeting will include items that require the most discussion
- Staff to send out a questionnaire to the group to gather feedback on specific questions ahead of the next meeting
